Handbook of Automotive Engineering

By Ulrich W. Seiffert, Hans Hermann Braess

One of the most comprehensive encyclopedias of vehicle systems and design, this book features 1600 pages packed with information on automotive design and applications from over 40 subject matter experts.

978-0-7680-0783-1, 638 pp., Hardbound 2005.

\$139.95 List

Product Code: R-312

Once Upon a Time in the Woods

Stephen Krensky

In this book, young readers will learn the ways in which seeds are dispersed in nature, including how the wind propels them using engineering principles.

978-0-7680-3488-2, 28 pp., Paperbound 2011.

\$11.95 List

Alternative Cars in the 21st Century, Second Edition A New Personal Transportation Paradigm

By Robert Q. Riley

The rapidly changing landscape of alternative car technologies created the need for this updated edition. New and expanded topics include intelligent transportation systems, hybrid vehicles, alternative fuels including fuel cell technology and hydrogen as a fuel, and three-wheel cars.

978-0-7680-0874-6, 514 pp., Hardbound 2003.

World History of the Automobile

By Erik Eckermann

This book details the development of the automobile from its early beginnings to the present day. With emphasis on the European historical perspective, particularly the pioneering developments.

978-0-7680-0800-5, 382 pp., Paperbound 2001.

An Introduction to Sustainable Transportation

By Eric C. Bruun, Preston Schiller, Jeffrey R. Kenworthy

This explores the concepts of sustainable development and sustainable transportation, describes practical techniques for comprehensive evaluation, provides tools for multi-modal transport planning, and presents innovative mobility management solutions to transportation problems.

978-1-84407-664-2, 400 pp., Paperbound 2010.

\$39.95 List

Product Code: B-899

Infotainment Systems

By Ronald K. Jurgen

This book contains 87 papers covering the past eight years (2000-2007) of engineering developments related to infotainment systems.

978-0-7680-1943-8, 742 pp., Hardbound 2007.

\$49.99 List

Product Code: PT-135

Reinventing the Automobile

By Lawrence D. Burns, Christopher Eric Borroni-Bird, William J. Mitchell

In this path breaking book, William Mitchell and two industry experts re-imagine the automobile, describing vehicles of the near future that are green, smart, connected, and fun to drive.

978-0-262-01382-6, 240 pp., Hardbound 2010.

\$21.95 List

Product Code: B-896

Navigation and Intelligent Transportation Systems

This book contains 40 papers covering the technical and functional aspects of these systems including: 3D mapping, route guidance, cellular phone access, electronic compasses, and the history and future of navigation systems.

978-0-7680-0264-5, 350 pp., Hardbound 1998.

Cooperative Communications for Improved Wireless Network Transmission: Framework for Virtual Antenna Array Applications

By Murat Uysal

This book details the principles of cooperative communication. Containing research from leading international experts, this premier reference source offers readers diverse findings and exposes underlying issues in the analysis, design, and optimization of wireless systems.

978-1-60566-666-2, 632 pp., PDF Only 2010.

Telematics Communication Technologies and Vehicular Networks: Wireless Architectures and Applications

By Yuh-Shyan Chen, Chung-Ming Huang

This book examines critical issues involved with telematics such as vehicular network infrastructure, vehicular network communication protocols, and vehicular services and applications.

978-1-60566-841-3, 438 pp., PDF Only 2010.

Transport Revolutions

Moving People and Freight Without Oil

By Anthony Perl, Richard Gilbert

This book sets out the challenges that will soon threaten modern society's dependence on low-cost transport in light of the problems posed by oil supply and climate change.

978-1-84407-248-4, 368 pp., Hardbound 2008.

Movement - Aware Applications for Sustainable Mobility: Technologies and Approaches

By Monica Wachowicz

This book focuses on the use of location sensing technology and its wider applicability in supporting sustainable mobility, and presents current research on developing innovative approaches for gathering, representing, storing and analyzing movement data sets generated from location sensing technology.

978-1-61520-770-1, 338 pp., PDF Only 2010.

Intelligent Transport Systems in Europe: Opportunities for Future Research

By Vito Mauro, Richard Hall, Mike McDonald, Oliver Fakler, Job Klijnhout, Angela Spence, Christoph Hecht, Hartmut Keller

This book provides valuable insight and critical appraisal of key areas of intelligent transport systems (ITS) for land transport in Europe. The material draws on over four years of study by the ROSETTA project — part of the European Commission 5th Framework Program.

978-9-8127-7261-9, 338 pp., PDF Only 2006.

Advances in Vehicular Ad-Hoc Networks: Developments and Challenges

By Mohamed Watfa

The flexibility of Vehicular Ad Hoc Networks (VANETs) opens the door to a myriad of applications; this book tackles the prevalent research challenges that hinder a fully deployable vehicular network. This unique reference presents a unified treatment of the various aspects of VANETs and is essential for researchers working in the automobile industry.
